VAISHAK P

Demo Reel Breakdown: start / duration

1: Biped Auto Rigging Tool   0:03:10 / 0:19:20
Developed the entire tool. Written in Python.
Flexible enough to deliver industry standard biped rig
Feature highlights : Bendy limbs, stretch squash, advanced spine

2: Rig capability demo   0:23:05 / 0:24:01
Modelled, Rigged
Rigged using the above mentioned tool. Presented as a demo
for the flexibility of the tool

3: Miraculous Ladybug   0:47:06 / 0:07:04
Rigged the character shown (main character)

4: Abominable Christmas   0:54:10 / 0:05:20
Rigged all the characters in the scene. (main characters)

5: Pose Space Deformer Tool   1:00:05 / 0:32:18
Fast, efficient, production ready tool written in Python
No plug-in used, written from scratch.
Feature highlights : Auto driver selection, Mirror setup

6: Purple Turtle   1:32:23 / 0:04:22
Rigged the purple turtle character
Rig highlights: Advanced biped rig with retractable limbs
              (Retraction is driven with rig setup to ensure
               animator controlled shape and direction)

7: Amul Butter (Commercial)   1:37:20 / 0:03:15
Rigged the girl character with advanced biped setup,
Dynamic cloth setup

8: Skull Coast Rum (Commercial)   1:41:10 / 0:01:21
Rigged the skeletal character with dynamic cloth setup

9: Real-time Dynamics Plug-in   1:43:00 / 0:19:20
Developed python based plug-in for Maya to
produce real-time dynamics
Plug-in highlights : Faster and efficient with one to one
                     connection.
                     Controllable factors like Stickiness,
                     Stiffness, Damp, Drag
